- A doesn't belong because _____.
- B doesn't belong because _____.
- C doesn't belong because _____.
- D doesn't belong because _____.

Which One Doesn't Belong?

Sample Responses

Think carefully about what is the same and what is different about each picture. Describe your ideas as clearly as possible to another person. You can find ways to explain why any one of the four pictures does not belong with the others.

- A doesn't belong because it's the only one that shows half (or shows a fraction that is not greater than half).
- B doesn't belong because it's the only one that is not divided into equal parts.
- C doesn't belong because it's the only one that shows a fraction on a number line.
- D doesn't belong because it's the only one that shows 5 parts — all the others show 4 parts.
