

## How to Write a Science Report

- I start with a question.
- I make a hypothesis (guess) about this question and explain why this is my hypothesis.
- I follow the steps of an experiment carefully to check if my hypothesis is correct.
- I record all my observations while I am working.
- I reach a conclusion and give evidence to support my conclusion.

# My Science Report

## Question

I want to find out ...

## Hypothesis

I think \_\_\_\_ will happen in this experiment because \_\_\_\_\_.

## Observations

During the experiment, I observed that .... (use pictures & words to show what you observed!)

## Conclusion

My conclusion is \_\_\_\_\_. Evidence that supports this conclusion is \_\_\_\_\_.
